PROFESSIONAL SUMMARY

An experienced Application Support Analyst and Technical Specialist with over 8 years of experience in FinTech, Enterprise IT, and SaaS environments. bridging the gap between technical infrastructure and end-user requirements.

Proven track record in 2nd/3rd line support, API troubleshooting (REST/JSON), and SQL-based data analysis. Adept at diagnosing complex application issues, leading service transition projects, and driving user adoption through clear documentation. A proactive problem solver who utilizes PowerShell and technical documentation to automate fixes, currently seeking to leverage experience in Azure and Payment APIs to transition into a dedicated Application Support Engineer role.

KEY SKILLS & CORE COMPETENCIES

Application Support & Technical Troubleshooting

- **API & Integration Support:** Extensive experience troubleshooting RESTful APIs using Postman; analysing JSON/XML payloads to resolve payment gateway failures (ACI, Cybersource).
- **Data Analysis (SQL):** Proficient in writing SQL queries to extract data for ad-hoc business reporting and diagnosing transaction failures outside of standard dashboards.
- **SaaS & Cloud Support:** Hands-on experience administering users and services via Microsoft Azure Portal, Intune, and M365.
- **Functional Application Support:** Ability to troubleshoot complex application logic (e.g., financial modelling or payment flows) and "signpost" issues for development teams when deep code fixes are required.

Service Delivery & Frameworks

- **Incident Management:** Strong adherence to ITIL frameworks for Incident, Problem, and Change management; experienced in root cause analysis (RCA) for recurring technical issues.
- **Service Design (ITIL/SABSA):** Experience designing service catalogues and support structures aligned with ITIL and SABSA security frameworks.
- **Major Incident Response:** Proven ability to manage high-pressure outages for critical clients, adhering to strict SLAs (Platinum/Gold tiers).

TECHNICAL TOOLKIT

- **Scripting & Automation:** PowerShell (Scripting via technical documentation), SQL (Querying/Reporting), JSON, XML.
- **Infrastructure & Cloud:** Microsoft Azure (Portal Admin), Windows Server (Runbook execution & Management), Citrix VDI, VMWare.
- **Support Tools:** Postman (API Testing), ServiceNow, Jira, SolarWinds (Monitoring), Splunk (Log analysis awareness).
- **Security:** Microsoft Defender, Proofpoint, PCI DSS Compliance.

PROFESSIONAL EXPERIENCE

University of Manchester | *Security Service Owner & Technical Writer* Sept 2024 – Present | Remote

- **Service Design:** Designed the university's first Security Service Catalogue, mapping 12 core security applications to the NIST CSF framework and aligning artefacts with SABSA/ITIL principles.
- **Stakeholder Management:** Led fortnightly technical workshops with IT operations and security teams to resolve service blockers and define support matrices.
- **Process Improvement:** Overhauled the documentation operating model, ensuring critical support procedures for security incidents were accurate and accessible to the 24/7 support team.

Total Processing | *Senior Client Support (Team Lead)* Aug 2022 – Dec 2023 | Manchester

- **Major Incident Management:** Provided 24/7 on-call support for critical payment infrastructure outages, prioritising resolution for high-value (Platinum to Bronze) merchants.
- **Application Monitoring:** Developed a trend analysis dashboard using data visualization tools to identify recurring application failures, successfully increasing transaction approval rates from 76% to 93%.
- **API Troubleshooting:** Served as the escalation point for technical integration issues, debugging API logs (JSON/XML) and merchant configurations within the payment gateway.
- **Onboarding Efficiency:** Reduced new client onboarding time by 30% by standardising technical documentation and creating a self-service knowledge base for API integrations.

Bank of America | *Sr Systems Engineer* Dec 2020 – Apr 2022 | Chester (Fixed Term Contract)

- **Service Transition (Migration):** Technical lead for a critical infrastructure project migrating 500+ users to a new VDI environment; handled all 2nd/3rd line floorwalking and issue resolution during cutover.
- **Disaster Recovery:** Created detailed scope documents and technical recovery plans for senior stakeholders, ensuring compliance across EMEA and APAC regions.
- **ITIL Process:** Authored core Standard Operating Procedures (SOPs) for the Global Service Desk, significantly improving the consistency of incident handling for Windows

Server and VDI issues.

Parliamentary and Health Service Ombudsman | *IT Service Desk Analyst Sept 2020 – Dec 2020*

- **Azure Administration:** Managed user access and service health via the Azure Portal, executing technical runbooks to resolve server and application incidents.
- Provided 1st/2nd line support for enterprise applications, embedding improved problem management processes to reduce ticket volume.

EARLIER CAREER (2011–2020)

- **Service Desk Analyst** – BUPA
- **IT Service Delivery Analyst** – World Wide Technology
- **IT Service Desk Analyst** – Tata Consulting Services
- **1st Line Support Analyst** – Interact Intranet

EDUCATION & CERTIFICATIONS

- **Career Essentials in Generative AI** – Microsoft & LinkedIn
- **BTEC National Diploma (ICT)** – Stockport College
- **GCSEs (8)** – St James Roman Catholic High School
